

Fun Facts for Young Primary Students

How do we measure wind?

How do we measure wind?

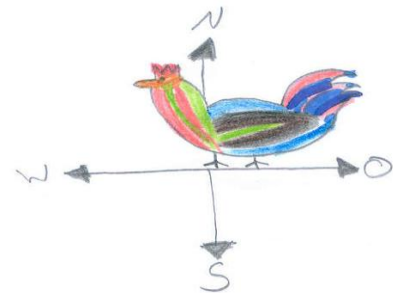

We use special instruments to measure wind.

Weather vane

A weather vane shows us the direction of the wind.

They are often seen on the steeples of churches.

Look up the next time you pass by a church.

Weather sock

A weather sock tells us what direction the wind is blowing.

We often see these at the seaside.

Anemometer

An anemometer measures how fast the wind blows.

The stronger the wind, the faster it turns around.
